

KATAPULT

*Testing as a Service at Enterprise-Scale
by Kitu Systems*

Can your platform handle hundreds of thousands of DERs at once? Performance cliffs and certificate failures stay hidden until your first real DER event.

Test it with Katapult!

Katapult is Kitu's scale testing platform for utilities and aggregators, built to test and certify DER programs at fleet scale using IEEE 2030.5.

**Scale Testing up to
1M Devices**

**Test Results with
Analysis**

**IEEE 2030.5
Certificate Ready**

SERVICES INCLUDED

- Scoping and test plan design
- Full test execution using Katapult
- Results report + expert analysis
- Professional services bundle
- Remediation guidance
- Test certificate provisioning

PRICING

All of our services can be customized to fit your specific needs, with tiered pricing by device scale (5K–1M) billed daily. Contact us for a custom quote.

Professional engagement + proven scale testing = Katapult certified

PROVEN AT SCALE

1M

devices tested

Validated through a landmark one million device scale test, one of the largest DER interoperability tests ever conducted, measuring concurrent connections, message throughput, and response latency under real protocol load.
